Forecast for Tuesday 12 Dec 2023

Weather: A band of rain will moves eastward across the park during the early hours of Tuesday morning, introducing a period of heavy rain and low cloud across the area. Low cloud persisting throughout the day but becoming largely dry for a time during the morning, before showery rain moves across the area from midday.

Chance of cloud-free hill tops above 600m: 10% throughout

Low Cloud and visibility: Low cloud shrouding all hills throughout the day, potentially reaching down to lower levels at times. Visibility therefore expected to be poor or very poor in cloudy and wet conditions.

Meteorologist's View

A murky day on the hills with low cloud and poor visibilities. Feeling cold with waterproofs required due to outbreaks of rain.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 11 Dec 2023	10.6mm	35.6mm	52.2mm

Forecast for Wednesday 13 Dec 2023

Weather: Perhaps some patchy low cloud around first thing to start on Wednesday, with the risk of some wintry precipitation across the tops. This cloud soon moving away to give a largely clear day with plenty of bright spells and remaining dry. Feeling cold in brisk northerly winds at first, but winds easing into the afternoon. Widespread frost then developing into the evening.

Maximum wind: Northerly 15mph with gusts of 30mph at first, easing in the afternoon

Chance of cloud-free hill tops above 600m: 40% at first, increasing to 90% through the morning

Low Cloud and visibility: Poor visibilities in any patchy cloud shrouding the hills at first. Cloud soon lifting with visibilities becoming good or very good through the morning.

Temperature: **Valleys:** Plus 5 Celsius, falling to 1 Celsius in the evening.
At 600m: Plus 2 Celsius, falling to 0 Celsius in the evening
Freezing level: Above all summits, falling to 600m in the evening
